

LINCOLN CITY/LANCASTER COUNTY PLANNING STAFF REPORT

P.A.S.: Preliminary Plat #02002
Fairway Park

DATE: April 3, 2002

PROPOSAL: Preliminary plat with 10 lots and one outlot.

WAIVER REQUESTS:

- 1) Stormwater detention/retention
- 2) Sidewalks along south side of Teresa Street west of the private roadway
- 3) Curve radius to 25'
- 4) A waiver to §26.23.181, which requires that all of the areas of habitation and employment be raised above the 100 year frequency flood

LAND AREA: 7.2 acres, more or less

CONCLUSION: The Land Use Plan designates this area as Industrial. Although a mobile home court currently exists on the land, the Comprehensive Plan discourages residential uses in industrial areas (p 43). This proposed plat conforms with the Comprehensive Plan, the Zoning and Subdivision Ordinances, and the flood plain development regulations.

<u>RECOMMENDATION:</u>

Conditional Approval

GENERAL INFORMATION:

LEGAL DESCRIPTION: Lot 114 and 124 I.T., located in the NE 1/4 of Section 13-10-6, Lancaster County, Nebraska, generally located at Theresa Street and N. 27th Street.

LOCATION: N. 27th Street and Theresa Street

APPLICANT: JAROCK, Inc.
Corinne Jarrett
2545 Theresa Street
Lincoln, NE 68521
(402) 474-7157

OWNER: same

CONTACT: August Ponstingl
Ross Engineering
201 N. 8th Street - Suite 401
Lincoln, NE 68508
(402) 474-7677

EXISTING ZONING: I-1 Industrial

EXISTING LAND USE: Mobile home court

SURROUNDING LAND USE AND ZONING:

North:	I-1	Shady Elms mobile home court
South:	I-1	Industrial
East:	H-3	Commercial
West:	P	Theresa Street Treatment Plant

COMPREHENSIVE PLAN SPECIFICATIONS: The Comprehensive Plan designates this area as Industrial.

The Land Use Goals section for Industrial land states “*residential uses are discouraged in industrial areas.*” (p 43)

HISTORY:

Date when preliminary plat was submitted: **1/11/02**
Date when Planning Director’s letter was sent: **2/11/02**
Date when revised preliminary plat was submitted: **3/15/02**
Other pertinent dates:

On **August 18, 1986**, City Council approved Special Permit #74A, which permitted the construction of a storage shed within the mobile home court.

On **November 7, 1955**, City Council approved Special Permit #74, which revised the plans for the existing mobile home court.

UTILITIES: Available.

TOPOGRAPHY: Flat. The entire area is within the 100 year flood plain.

TRAFFIC ANALYSIS: Theresa Street is a local street.

PUBLIC SERVICE: The closest fire station is located near N. 14th Street and Adams Street.

REGIONAL ISSUES: Reduction of flood storage capacity and public safety (places of employment located in the flood plain).

ENVIRONMENTAL CONCERNS: Additional construction in the flood plain.

ALTERNATIVE USES: Design incorporating “no net rise” principles.

ANALYSIS:

1. This application is for 10 lots and one outlot.
2. The applicant has indicated that the purpose of this preliminary plat is “...to protect the investment in the property. In the event that an ordinance is passed restricting development in the flood plain, our client would lose a substantial investment...” In a letter to residents of the Shamrock Mobile Home Court, the owners state that “we have no immediate plans [for the property], but are only reacting to upcoming changes that the City intends to instigate that otherwise would limit what we might be able to do with the property.”
3. The flood plain regulations are currently being reviewed by a task force. This application must be reviewed using current ordinances and design standards.
4. The request to waive the requirement that places of employment and habitation be raised to one foot above the 100 year flood elevation is acceptable. Flood proofing the buildings reduces the amount of fill in the flood plain.
5. The request to waive sidewalks along the south side of Theresa street west of the private roadway should be denied. The sidewalk on the north side of Theresa continues to the eastern boundary of the City property and the sidewalk on the south side should do likewise.
6. Drainage from this subdivision flows to other private property and is not directly conveyed to Salt Creek. Public Works & Utilities recommends that the waiver of stormwater retention/detention be denied - the waiver that was granted for the Carroll M5 Industrial Park on the north side of Theresa Street did not cause the water to drain through other private property.
7. The Lincoln-Lancaster County Health Department “...endorses the opportunity to eliminate industrial and residential zoning conflicts to reduce public health threats from incompatible land uses.”

8. The Land Use Plan designates this area as Industrial. Although a mobile home court currently exists on the land, the Comprehensive Plan discourages residential uses in industrial areas (p 43). The proposed plat conforms with the Comprehensive Plan and the flood plain development regulations in the Zoning and Subdivision Ordinance.

WAIVERS:

Sidewalks west of the private roadway on Theresa Street	Denial
Stormwater detention/retention	Denial
Centerline radius	Approval
§26.23.181 (buildings must be above 100 year flood plain)	Approval

CONDITIONS:

Site Specific:

1. After the subdivider completes the following instructions and submits the documents and plans to the Planning Department office, the preliminary plat will be scheduled on the City Council's agenda: (NOTE: These documents and plans are required by ordinance or design standards.)
 - 1.1 Revise the preliminary plat to show:
 - 1.1.1 Sidewalks along Theresa Street abutting this property.
 - 1.1.2 On sheet 5 of 10, amend Note 2 to state "100 year flood elevation".
 - 1.1.3 To the waiver requests on sheet 1 of 10, add §26.23.181, which requires that all of the areas of habitation and employment be raised above the 100 year frequency flood.
 - 1.1.4 Sign the Surveyor's Certificate.
 - 1.1.5 Remove the City Departments and Utilities from the Cover Sheet. This information is not required by the Ordinance.
 - 1.1.6 Remove the "t" in front of Note 1.
 - 1.1.7 The north south dimension on the east side of Lot 3 Block 1 appears to have been measured from the north side of the I.T. instead of the property boundary.
 - 1.1.8 Please identify what the 15' labels in Lots 3 and 6 are measuring.
 - 1.1.9 Remove one of the street labels.

- 1.1.10 Remove the front yard setback dimensions. Add a note stating, "Front yard setbacks shall be measured from the edge of the public access easement along N. 25th Place."
- 1.1.11 Revise the public access and utility easement so that it matches the Outlot boundary. The utility easement overlaps the 10 foot easement L.E.S. requested. This change also ensures that there will not be confusion about the front yard setback - it begins at the property lines this way.
- 1.1.12 Measure the 10 foot utility easement along Theresa Street from the lot line *after* the right-of-way is dedicated.
- 1.1.13 Revise the drainage study and grading plan to the satisfaction of Public Works & Utilities.
- 1.1.14 Provide elevations for the buildings.
- 1.1.15 Revise Notes 4 and 5 so that they do not conflict - 33' of paving is required.
- 1.1.16 Revise the sanitary sewer easement across Lots 3 and 4 to show the easement 15' north of sewer centerline.

2. The City Council approves associated request:

- 2.1 An exception to the design standards to permit shorter centerline radius for curves.
- 2.2 A modification to the requirements of the land subdivision ordinance to permit areas of employment which are not raised above the 100 year frequency flood.

General:

3. Final Plats will be scheduled on the Planning Commission agenda after:

- 3.1 The sidewalks, streets, drainage facilities, street lighting, landscape screens, street trees, temporary turnarounds and barricades, and street name signs have been completed or the subdivider has submitted a bond or an escrow of security agreement to guarantee their completion.
- 3.2 The appropriate portions of Special Permit Nos. 74 and 74A are rescinded according to the Phasing Plan.
- 3.3 The subdivider has signed an agreement that binds the subdivider, its successors and assigns:

- 3.3.1 To submit to the Director of Public Works an erosion control plan.
- 3.3.2 To protect the remaining trees on the site during construction and development.
- 3.3.3 To submit to lot buyers and home builders a copy of the soil analysis.
- 3.3.4 To continuously and regularly maintain street trees along the private roadways.
- 3.3.5 To complete the private improvements shown on the preliminary plat.
- 3.3.6 To maintain the outlots and private improvements on a permanent and continuous basis. However, the subdivider may be relieved and discharged of this maintenance obligation upon creating in writing a permanent and continuous association of property owners who would be responsible for said permanent and continuous maintenance. The subdivider shall not be relieved of such maintenance obligation until the document or documents creating said property owners association have been reviewed and approved by the City Attorney and filed of record with the Register of Deeds.
- 3.3.7 To comply with the provisions of the Land Subdivision Ordinance regarding land preparation.
- 3.3.8 To inform all purchasers and users that the land is located within the 100 year flood plain and that the grading of the lot shall be in conformance with the grading plan approved with the Fairway Park Preliminary Plat #02002 or as amended by the Director of Planning. The volume of fill material brought into each lot from outside the flood plain shall not exceed that shown on the approved grading plan accompanying the preliminary plat.

From: *DB* Dennis Bartels, Engineering Services
Subject: Fairway Park Revised Preliminary Plat
Date: April 4, 2002
cc: Roger Figard
Randy Hoskins
Nicole Fleck-Tooze
Virendra Singh

Engineering Services has reviewed the revised preliminary plat for Fairway Park Located at 26th and Theresa Streets and has the following comments:

1. Water - The water system has been revised and is satisfactory.
2. Sanitary Sewer - The sewer easement for the existing 30" sewer across Lots 3 and 4 has not been revised to show 15' of easement north of the sewer centerline. The revised easement must be shown.
3. Drainage - The drainage study does not meet design standards and must be revised. The study is required by design standards. The calculations must be revised to show the 100 year major storm as well as the 10 year storm along all flow paths. Elevations need to be shown for buildings or development to be protected along these flow paths.

Drainage from this subdivision flows to other private property and is not directly conveyed to Salt Creek.

The reasons given by the developer's engineer are not sufficient for Public Works to recommend waiver of subdivision ordinance detention requirements. The waiver recommended for the Mark V Industrial Park located north of Theresa Street did not drain through other private property.

4. Streets - The requested waiver for the centerline radius of North 25th Street is satisfactory.
- General Notes 4 and 5 are in conflict with each other. 33' of paving is required.

Sidewalks should be required the entire length of Theresa Street, not stopped at the private roadway.

5. General - The information shown on the preliminary plat relating to the public water main system, public sanitary sewer system and public storm sewer system has been reviewed to determine if the sizing and general method of providing service is satisfactory. Design consideration including, but not limited to, location of water main bends around curved and cul-de-sacs, connection of fire hydrants to the public main, temporary fire hydrant locations, location and number of sanitary sewer manholes, location and number of storm sewer inlets, location of storm sewer manholes and junction boxes, and the method of connecting storm sewer inlets to the main system are not approved with this review. These and all other design considerations can only be approved at the time construction drawings are prepared and approved.

**LINCOLN-LANCASTER COUNTY HEALTH DEPARTMENT
INTER-OFFICE COMMUNICATION**

TO: Jason Reynolds	DATE: 1/23/2002
DEPARTMENT: Planning	FROM: Chris Schroeder
ATTENTION:	DEPARTMENT: Health
CARBONS TO: Bruce Dart, Director EH File EH Administration	SUBJECT: Fairway Park PP #02002

The Lincoln-Lancaster County Health Department (LLCHD) has reviewed the site plan and accompanying documentation for the proposed Fairway Park development with the following noted:

- The LLCHD endorses the opportunity to eliminate industrial and residential zoning conflicts to reduce public health threats from incompatible land uses.
- All wind and water erosion must be controlled during construction. The Lower Platte South Natural Resources District should be contacted for guidance in this matter.
- During the construction process, the land owner(s) will be responsible for controlling off-site dust emissions in accordance with Lincoln-Lancaster County Air Pollution Regulations and Standards Article 2 Section 32. Dust control measures shall include, but not limited to application of water to roads, driveways, parking lots on site, site frontage and any adjacent business or residential frontage. Planting and maintenance of ground cover will also be incorporated as necessary.

Subject: Re: Fairway Park Preliminary Plat #02002

Jason, For commercial/industrial zoned areas we would encourage developers to floodproof structures over bringing in fill, this way we can preserve flood storage. However, you may want to check with Public Work to see what their take would be on this. The developer/builder must understand there are additional structural requirements that need to be looked at to floodproof a building and insurance rates may be more expensive for a none elevated building. Subject: Fairway Park Preliminary Plat #02002

Dale -

We just discussed this applicant's request to waive the Subdivision Ordinance requirement that all places of habitation and employment be raised one foot above the 100 year flood elevation. You indicated that in commercial/industrial areas the City encourages floodproofing in lieu of fill. If done in accordance with the requirements of the Zoning Ordinance floodproofing reduces the amount of fill in the flood plain. For that reason, the waiver request is acceptable.

Please let me know if this summary is accurate so that I may include your comments in my report.

Thanks!

RE: Fairway Park
Preliminary Plat
N. 26th and Theresa St.
REI Project No. 133301-B

Dear Kathleen:

On behalf of JAROCK INC., we are submitting an application for a Preliminary Plat. The total area is 7.197 acres and is zoned I-1. The proposed development, generally located at N. 26th Street and Theresa Street, is for 10 lots and one Outlot. The Outlot is for the private roadways, sidewalks, and utilities. The 1994 Lincoln-Lancaster County Comprehensive Plan identifies this area as industrial on the Land Use Plan. The area is currently Shamrock Mobile Home Park and is located south of Shady Elm Mobile Home Court, north of Kimco Industrial Park, and east of the State Fairgrounds and Wastewater Treatment Plant.

We would like to begin by listing the reasons our client is submitting this preliminary plat.

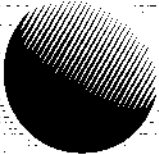

1. The primary reason for submitting this Preliminary Plat is the fact that all of Shamrock Park lies within the 100 Year Flood Plain. The City of Lincoln discourages use of land within these areas for residential development. Based upon discussions with the City of Lincoln Planning Department, it is anticipated that the City Council will enact new development procedures that will limit the use of property that lies within a Flood Plain to exclude this type of development.
2. The second reason for this submission is to protect the investment in the property. In the event that the ordinance is passed restricting development in the flood plain, our client would lose a substantial investment made in their land in both time and money, and in lost opportunity. Shamrock Mobile Home Park has been a family run business for many years, and our client owns approximately forty-five percent of the trailers on the property. There have been numerous costly repairs and upgrades over the years to maintain the park. All this investment is potentially lost if restrictions are passed. Additionally, some of the proposed restrictions would unfairly limit improvements to this site where as adjacent property have already benefited by developing to more productive uses.
3. Finally, the land could be developed in many ways more suitable to existing uses adjacent to the property. For example, immediately to the west is the City sewage treatment plant. Although improved, there are still many offensive odors and sounds that negatively affect a residential development. To the south and to the east of the property is industrial/commercial development. And based on a recently approved Preliminary Plat for Carroll M5 Industrial Park the area to the north will

JAN 11 2002

Lincoln-Lancaster County
PLANNING DEPARTMENT

The Candy Factory

Phone 402.474.7677
Fax 402.474.7678

www.rossengineering.com

be developed with additional industrial and commercial buildings. These industrial developments are inherently incompatible with a residential development due to the many negative externalities that accompany industrial development. The long-term use of this land as a trailer park appears by all standards and conventions an inappropriate use for this site.

We want to reassure the City and current residents of Shamrock Mobile Home Park, there are no immediate plans to start construction, move, or displace anyone. This is simply a precaution to be able to develop the property in the future as currently allowed by the existing I-1 Industrial Zoning District, at such time that the City either forces our client to stop using the property as a Mobile Home Park, or our client decides to begin to use a portion of the property for other allowable uses. In the interim, Shamrock Mobile Home Park intends to continue to operate as usual.

If, in the event that there is any change in the use of the existing Mobile Home Court, it will be done in such a fashion that will not suddenly displace anyone. It will be done in a manner that will cause the least amount of disturbance to the current tenants, and done in an orderly manner, phased over time. A minimum of a 90-day written notification will be given to all tenants who may be affected by such development. Access, and all current services will continue. The owners of Shamrock Mobile Home Park own a majority of the trailers, but for those who may be displaced, an attempt will be made to accommodate these residents in open spaces. The well being of the tenants is a high concern for JAROCK, INC.

To sum up the reasons for submitting this Preliminary Plat: First, due to anticipated changes in the ordinance for the City of Lincoln, a residential development within the Flood Plain may be prohibited. Secondly, the anticipated changes in the ordinance would remove development options and limit the return of investment of the land, and finally, the continued use of this land as a mobile home park is not in the best interests of the residents and the City of Lincoln.

The next section of this letter covers physical and engineering development issues such as roads, water, and sewers. To begin with, the entrance into the development will be from Theresa Street. The proposed street will be private and maintained through a property owners association. The Private Roadway shall be 33-feet wide as shown on the Site Plan. The name of the road is N. 25th St.. It then becomes N. 25th Place where it turn 90 degrees to the west and ends in a cul de sac. We are asking for a waiver of the centerline radius along the horizontal curve in the road due to the unique shape and small size of the property. The proposed radius of the street is 100', as compared to the required 150'. The street will be for local traffic only; therefore we don't anticipate heavy traffic. We have also widened the outside of the curve to allow for extra turning space for larger vehicles.

Public water and sanitary sewer will serve the development. The water main is proposed to be 8-inch and sanitary sewer 8-inch. The water main will tie into the existing 8-inch water main along Theresa Street. An existing 10-inch sanitary sewer main extends along the east boundary. A new 8-inch main will tie into the existing trunk sewer between Lots 4 & 5. A public access, pedestrian and utility easement is shown over the private roadway within the Outlot.

The entire site is located within the 100-Year Flood Plain as indicated on the FEMA Panel 25. The property shall be filled as indicted on the Grading Plan. A Flood Plain Development Permit will also be submitted.

In order to minimize the amount of fill material required to be brought into the Flood Plain, all of the proposed buildings will be flood proofed to an elevation of one foot above the 100 Year Flood Plain which has an elevation of 1147.6. This will allow for the exterior grade around the buildings and the parking lots and driveways to be kept at a lower finish grade than if each of the ten buildings were constructed to a finish floor elevation of 1148.6. Certain areas within the parking lots and drives will result in excavation below the existing ground elevation and will lessen the impact on the amount of fill within the

flood plain.

JAN 11 2002

We are requesting the following waivers to design standards:

- a. Allow a reduction in the minimum centerline radius for curves from 150-feet to 100-feet. The proposed Private Roadways are to serve this development only. The reduction in the horizontal curve will help lower the speed of traffic. We do not want to encourage drivers to speed through this area. We do not envision people using the proposed private roadway other than for access to one of the buildings.
- b. Storm-water detention/retention facility. We are requesting this waiver because of the proximity of Salt Creek to the site. The drainage plan shows that storm-water runoff will surface drain primarily to the southwest. After leaving the site, storm-water runoff will drain through a proposed drainage-way west of the site.

Enclosed you will find a copy of the letter JAROCK, INC. sent to the Tenants explaining the proposed Preliminary Plat. The owners are ready and willing to schedule a meeting with the residents of Shamrock Mobile Home Park if a substantial number of tenants have questions and concerns regarding the proposal.

This application includes the following:

1. Site Plan	17 copies
2. Existing Topographic Site Plan	7 copies
3. Street Profile	7 copies
4. Grading Plan	7 copies
5. Drainage Area Plan	7 copies
6. Utility Plan	7 copies
7. Phasing Plan	7 copies
8. Application for Preliminary plat	
9. Preliminary Plat technical Checklist	
10. Soils map and report	
11. Preliminary Plat Filing Fee	\$1,020.00
12. Letter to Shamrock tenants	

If you need any additional information or have questions, please call me.

Sincerely,

ROSS ENGINEERING, INC.

Shamrock Mobile Home Court

2545 Theresa
Lincoln, NE 68521
(402) 464-7157

January 2, 2002

Shamrock Mobile Home Court
2545 Teresa Street
Lincoln, NE

Dear Shamrock Tenants:

You may have followed some of the events of the existing Shady Elm Mobile Home Park located north of Teresa Street, during the past six months. The Owner of Shady Elm has decided to phase out the operation of the existing Mobile Home Park, and has submitted and received approval of a Preliminary Plat to eventually develop an Industrial Park in this location. They have started construction of the first phase of their development in an area furthest to the north, immediately south of the motel parking lot.

Part of the reason for discontinuing use as Shady Elm Mobile Home Park is the fact that the entire area lies within the 100 Year Flood Plain and the City of Lincoln discourages use of land within these areas for residential development, and plans to impose upcoming legislation which will severely limit the use of areas within a Flood Plain. Based upon discussions with the City of Lincoln Planning Department, it is anticipated that the City Council will enact new development procedures that prevent fill from being brought into a Flood Plain, which will limit the use of property that lies within a Flood Plain. A study group has been appointed that is currently reviewing development procedures and it is expected that within the next twelve months, new development standards will be approved by the City of Lincoln.

In order to protect our family's investment in our property, we have engaged the services of a local engineering firm to assist us with evaluation of the proper course of action to consider, in order to be able to continue to use our property to the fullest extent. Although we plan to prepare and submit a Preliminary Plat for our property, we want you to understand that we do not have any immediate plans to start any construction for other uses other than the current Mobile Home Court, or to move or displace anyone. We are simply taking steps to be able to develop our property in the future as currently allowed by the existing I-1 Industrial Zoning District, at such time that the City either forces us to stop using the property as a Mobile Home Court, or we decide to begin to use a portion of the property for other allowable uses. Please do not feel threatened by this action. We want you to be aware of what may be going on, not concerned. We have no current buyer or other developers waiting for any development plans to be approved; but in fact intend to continue to operate our business as usual at this time.

In the event that there is any change in the use of the existing Mobile Home Court, it will be done in such a fashion that will not suddenly displace anyone. Should a change be made in the future, it will be done in a manner that will cause the least amount of disturbance to the current tenants, and will be done in an orderly phased manner. We will agree to give a minimum of a 90-day written notification to any tenant who may be affected by any such development. Again, we have no immediate plans, but are only reacting to upcoming changes that the City intends to instigate that otherwise would limit what we might be able to do with the property.

JAN 11 2002

LINCOLN CITY CLERK
PLANNING DEPARTMENT

Once the Preliminary Plat has been completed and filed with the City of Lincoln Planning Department, there will be a notice of a Public Hearing before the Planning Commission and the City Council, posted by means of a yellow "Notice" sign on the property. You may also read of this in the newspaper or hear about it on the TV or possibly the radio. In addition you may be mailed a notice from the City, indicating a proposed change in the use of the area and informing you of the dates of the upcoming Public Hearings. Should you have any questions or concerns at anytime, please do not hesitate to either call or stop in the office. We may not be able to tell you anything more regarding any anticipated time frames, because as previously indicated, we do not have any immediate plans, nor have we been contacted by anyone interested in building within the existing property.

Thanks,

Bill and Corinne
